

Setup SqlDelight in the project

Kaaveh Mohamedi

 @Kaaveh_IO

 in/kaaveh

Course Overview

- Setup SqlDelight in project
- Setup Database
- Create tables
- Write needed queries

Combine tables

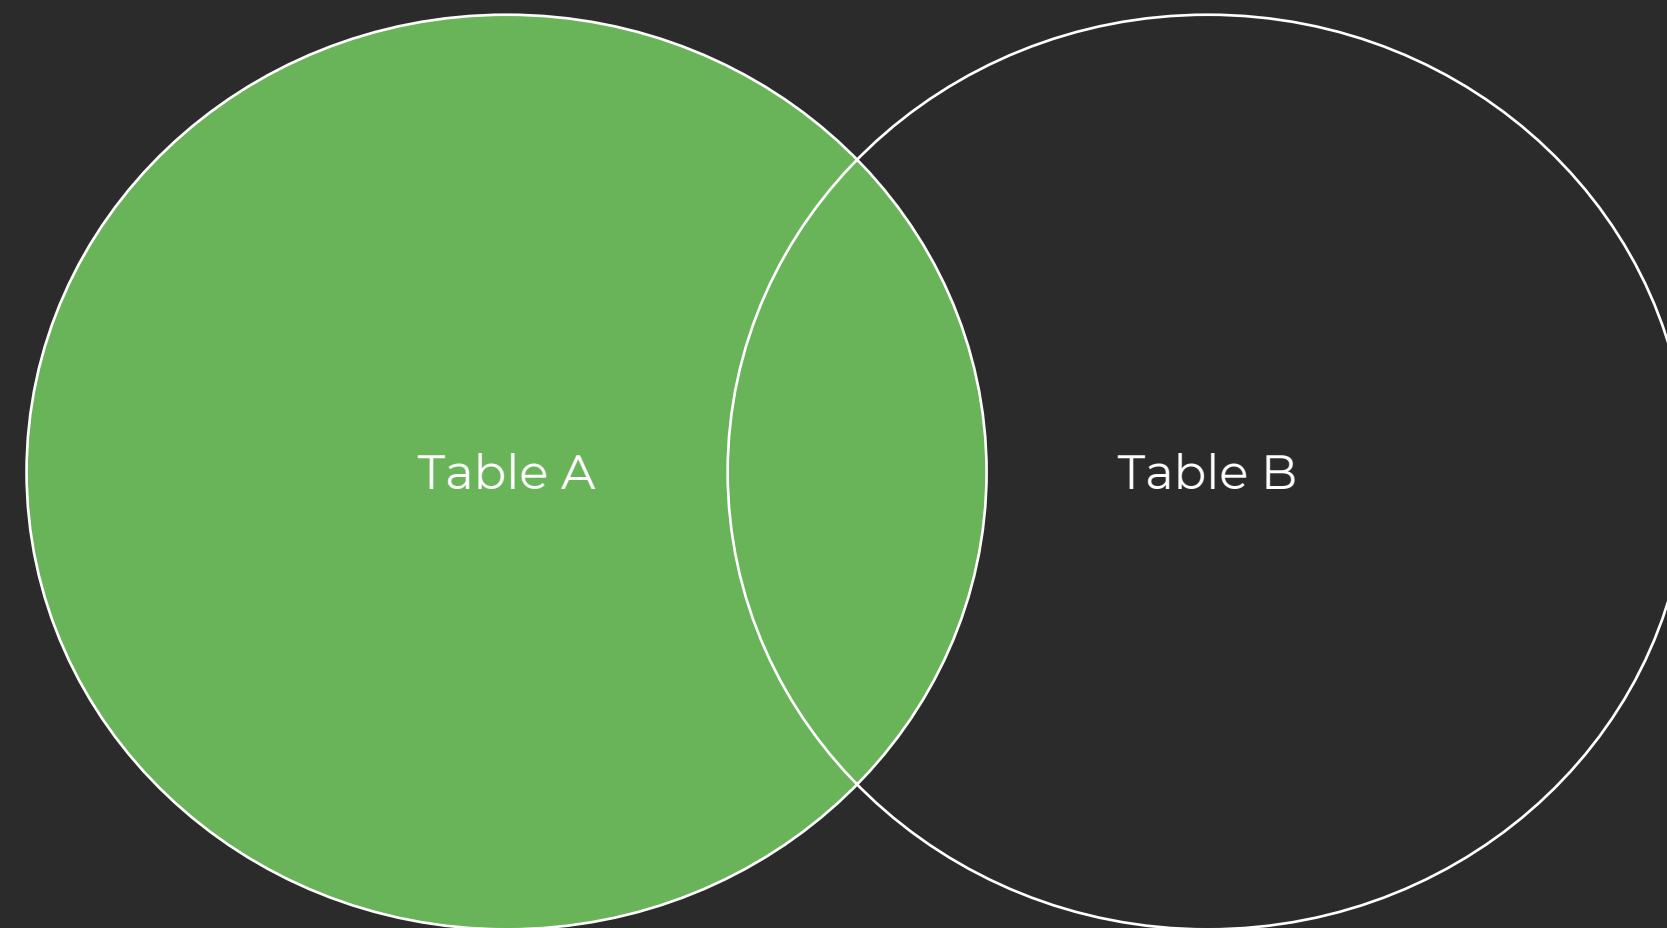

invoiceEntity

id	businessId	customerId	taxId	isPaid

Combine tables

- LEFT JOIN

Combine tables

customerID	Name
1	Sara
2	John
3	Kevin
4	Gorge

+

customerID	Type
1	normal
2	vip
3	normal
4	vip

Left join on **customerID**

customerID	Name	Type
1	Sara	normal
2	John	vip
3	Kevin	normal
4	Gorge	vip

Combine tables

invoiceEntity

+

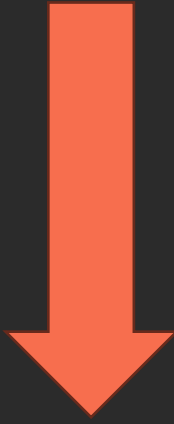

businessEntity

+

customerEntity

+

taxEntity

id	Business ...	Customer ...	Tax ...	isPaid

Summary

- Data Type
- Define Table
- Explore Some Common queries

Implementing SqlDelight
